Press Release

Remedial Alternatives Analysis Report Released for Public Review

Grand Haven, MI [November 10, 2026] – The City of Grand Haven, with support from the City's environmental and engineering consultant, HDR, is pleased to **announce the release of the Remedial Alternatives Analysis (RAA) Report and supporting documents, now available for public review on the project website: http://www.renewharborisland.org.**

This is an important milestone in Harbor Islands mitigation efforts. The over 100-page report evaluates potential remedial options for addressing the known environmental impacts resulting from past industrial and waste disposal. Along with the RAA Report, additional supporting documents and technical resources have been posted online to provide community members and stakeholders with comprehensive information about the ongoing project.

"We are committed to maintaining transparency throughout this process and ensuring the community has a voice in guiding decision-making for this significant community asset," said Derek Gadjos, Project Management Director for the City of Grand Haven.

Community members will also have an opportunity to learn more about the project and review informational materials at a townhall on December 1, 2026. Attendees will be able to review the Remedial Alternatives Analysis (RAA) and supporting documents, ask questions, and hear directly from subject matter experts and city officials about the findings and next steps in the process. An online version of the in-person meeting will be available for those interested or unable to attend. More details to come over the coming month.

Harbor Island Remediation Alternative Analysis Townhall
Date: December 1, 2026
Time: 5:00 pm -7:00pm with presentation from 5:30 pm-6:00 pm
Location: Central Park Place, 421 Columbus Street, Grand Haven MI
